

# Developing next generation partnerships in reproductive medicine

Hundreds of reproductive medicine organizations, independent clinics and cryobanks, academic medical facilities, and stem cell programs turn to Innovative Blood Resources, and its division Memorial Blood Centers, for advanced laboratory services, HCT/P testing, and biomedical expertise. Regulated and licensed by the FDA, our donor testing facilities and expert staff with extensive experience in high-volume testing is committed to providing high quality service every time.

- Dedicated customer service support with rapid turnaround time
- Comprehensive menu of competitively-priced screening and confirmatory tests
- World-class expertise makes us the partner-of-choice
- FDA-registered laboratory, CLIA-licensed, and AABB-accredited
- FDA-licensed tests kits with convenient shipping

## WE PROVIDE QUALITY SERVICES

- **Dedicated Customer Service Support**  
Personal attention and professional expertise to help guide you through every step of the process.
- **Automated and Redundant Equipment**  
Ensures uninterrupted testing with rapid turnaround times. Results typically available within 48-72 hours.
- **Staffed 7 Days a Week, Including Holidays**  
Our laboratory is staffed 7 days a week, including holidays, to ensure your turnaround time needs are met.

## WE DELIVER PEACE OF MIND

- **FDA-Licensed Collection Kits**  
All screening and confirmatory tests—including male and female test panels—are performed with FDA licensed, approved, or cleared test kits specifically for use in donor screening or approved/cleared for use in low-prevalence, asymptomatic populations.
- **Flexible Reporting Options**  
Customized test request forms and lab information software for reporting test results.
- **Convenient Shipping**  
Convenient prepaid return shipping labels supplied with sample shipping containers that meet IATA 650 requirements. Logistics support available for client convenience.

## WE ARE YOUR PARTNER-OF-CHOICE

From New York to California and beyond, Innovative Blood Resources provides best-in-class testing services to reproductive clinics. With nationally recognized medical and technical directors, large national organizations as well as independent clinics choose us to perform HCT/P testing for their patients and donors.

- Nationally recognized reproductive medicine and infertility clinics
- Cryobanks
- Academic medical facilities, including the Mayo Clinic
- Molecular and cellular therapeutics facilities
- Stem cell/bone marrow programs, including National Marrow Donor Program

We are here when you need us.

Look to Innovative Blood Resources to cost-effectively deliver what you and your clients need—anytime, anywhere. Find out more at [MBC.ORG/Testing](http://MBC.ORG/Testing) or contact:
